Odin von Doom

PROFILE

- ✓ Crazy about Code: it's like a second language now, and I'm only getting more articulate!
- ✓ Tetris Master: I keep it slick, organized, and easy to read as an open book.
- ✓ Prioritizer: I know how to separate the must-haves from the nice-to-haves.

EDUCATION AND CAREER DEVELOPMENT

Humber College   Sept. '12 - Present

School of Media Studies & Information Technology   Etobicoke, ON

Game Programming

- Focused on Object-Oriented programming, but also including web development, relational database implementation, physics programming, and other game-centric areas of study.
- Completed every year of study with honours.

PROJECTS

Tornadoom   May '14 - Present

http://grads.humbergameprogrammers.ca/odin/?pg=Games

- Capstone project at Humber College
- Built engine independently using WebGL
- No external libraries used
- You are a cow-chuckin' tornado, putting an end to an alien cow-abduction.

PROFESSIONAL EXPERIENCE

Humber College   Toronto, ON

Humber Students' Federation   May '14 – Present

Vice President of Student Affairs

- Act as point of contact for students to access HSF services, including the Emergency Food Bank, Volunteer Crew, and insurance plan;
- Advocate for the students' rights within most areas of the Humber community;

Student Recruitment   **June '13 – April '14**

Student Ambassador
- Guided tours of Humber College, North campus;
- Make outbound calls to prospective, applicant, approved, and confirmed students;
- Attend open houses, college/university fairs, convocation, and other public functions.

Peer Programs   **Oct '13 – April '14**

Personal Note Taker
- Attend classes of students whose disabilities limit their note-taking, and take their notes!

Student Success & Engagement   **June '13 – April '14**

Orientation Senior Leader
- Organized groups of volunteers to run orientation events;
- Trained other Senior Leaders and Orientation Volunteers.

Axon Digital Arts   **May '13 – August '13**

Web Developer   **Toronto, ON**
- Used mostly HTML and CSS, some JavaScript and PHP to build and style three websites for the University of Toronto's postgraduate medical department.
- Used Adobe Flash and AS3 to repair a malfunctioning/outdated site for the University of Toronto's postgraduate medical department.
